

- Stormor can provide and install a customised storage solution packaged to suit every business
- We have a wide selection of high quality commercial grade shelving and racking systems
- Our experienced team can design a warehouse layout which maximises your storage space and ensures products are stored safely and efficiently
- As well as our range of stock shelving products we can source materials handling and associated products to provide you with a complete warehouse solution

# RIVET SHELVING

Stormor Rivet Shelving is one of the most cost effective storage methods available. From a few standard components you can create rigid, very accessible shelving units with capacities of up to 300kg per shelf level.

Advantages include:

- No nuts or bolts required
- Height can be adjusted every 38mm
- Accessible from ends
- Easy to assemble
- Strong 18mm particle board shelves
- High quality powder coated finish

Stormor Rivet Shelving offers a world of versatile solutions for many shelving applications.

## HANDY ANGLE SHELVING

Stormor Handy Angle Shelving is efficient in both it's versatility and cost-effectiveness. Available in light, medium and heavy duty lengths, Handy Angle has many different uses that are only limited by your imagination. Primarily used as shelving, Handy Angle can also be used for other applications such as:

- Mezzanine Levels
- Work Benches
- Framework
- Platforms
- Bracing

Manufactured in sizes up to 3600mm, Handy Angle is available in any 50mm increment. This ensures that your racking can accomodate your exact requirements and not waste any valuable space.

Light: 40mm x 40mm

Medium: 60mm x 40mm

Heavy: 90mm x 40mm

# LONGSPAN SHELVING

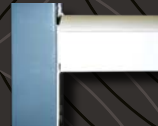

If you require shelving that is hard-wearing, carries large weight loads and is aesthetically pleasing, then Stormor Longspan is perfect for you.

Stormor Longspan is the key to solving all your general storage issues. With only three components: frames, beams and decking, installation is a simple process with many customers choosing to assemble Longspan themselves.

Stormor Longspan is envied within the industry as being the best looking shelving system in the market. Our frames have a hidden slot pattern in the rear of the posts, creating a sleek and sophisticated look.

With a huge combination of different sizes, Stormor Longspan can accommodate any application. Features and benefits include:

- Fully modular system
- Frames are pre-assembled
- Powder coated frames and beams
- Heavy duty “step beam” construction
- No sharp edges

Heavy Duty Construction

STANDARD WIDTHS	1200mm	1500mm	1800mm	2100mm	2400mm	2700mm	3000mm

# PALLET RACKING

Used predominantly for bulk goods storage, Pallet Racking maximises the space in a warehouse to cost-effectively increase storage capacity.

With the most commonly used Pallet Racking style being selective racking, it safely provides direct access to all pallets.

Many different standard heights are available. Pallet Racking is suited to all types of warehouses, from small business store rooms to large volume distribution centres.

Mesh decks or particleboard decking with shelf supports can also be used as shelf picking levels.

Stormor has the ability to supply all leading brands of Pallet Racking whether you need to add on to an existing setup, or require a custom designed complete warehouse solution.
